Data from Oregon Coast Shelf Waters
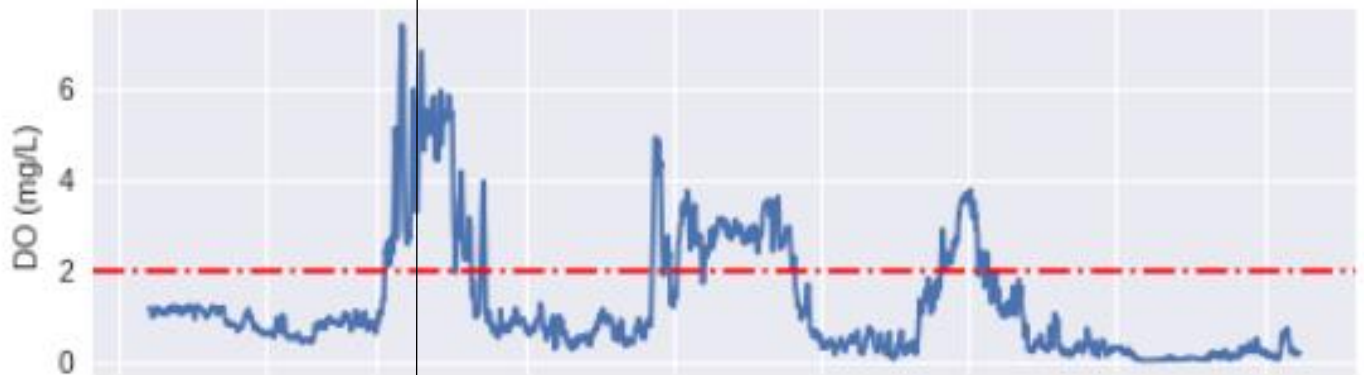

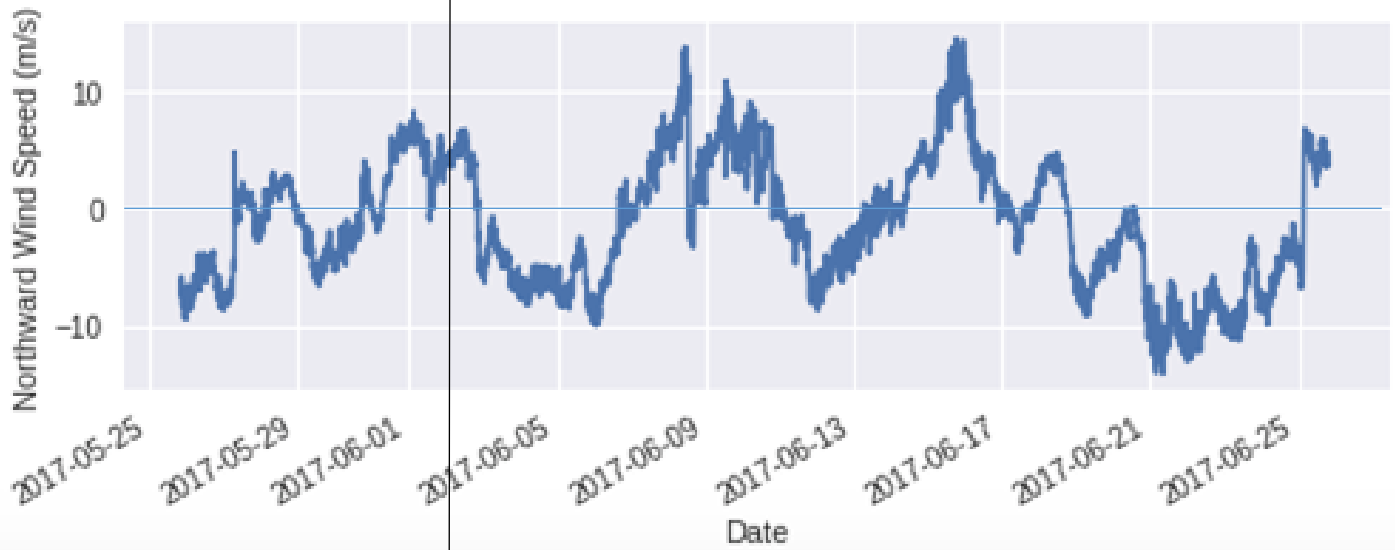

Data Summary. Describe the patterns and trends in the data for each graph supplied.

Wind data

Temperature Data

Dissolved Oxygen Data

Correlations across data sets

_____

Make a claim about what processes we studied might explain the cause of the death of large numbers of sea floor organisms similar to what was shown in the video.

Provide a list of all appropriate evidence from the data provided that support your claim.

List the science concepts and processes that are relevant to explain your claim.

Compose a complete explanation that incorporates all your evidence and your understanding of the science concepts and processes to support your claim or conclusion stated above.
